## Overview

This section covers the following topics:

- [Intended audience](#)
- [Related documentation](#)

## Intended audience

This book is intended for use by administrators who are experienced with the following:

- Fibre Channel technology
- HP StorageWorks Fibre Channel switches

## Related documentation

For a list of corresponding documentation, see the *HP StorageWorks HA-Fabric Manager release notes*.

The latest information, documentation, and firmware is available on the following HP web site: <http://h18006.www1.hp.com/storage/saninfrastructure.html>.

Information about Fibre Channel standards is available on the following Fibre Channel Industry Association web site: <http://www.fibrechannel.org>.

# Conventions

Conventions consist of the following:

- Document conventions
- Text symbols
- Equipment symbols

## Document conventions

This document follows the conventions in [Table 1](#).

**Table 1: Document conventions**

Convention	Element
Blue text: <a href="#">Figure 1</a>	Cross-reference links
<b>Bold</b>	Menu items, buttons, keys, tabs, and user input in a graphical interface. (Use plain text for all other GUI elements.)
<i>Italics</i>	Text emphasis and document titles (not CD titles) in body text
Monospace font	Command-line user input, commands, code, device instances, file and directory names, and system responses (output and messages)
<i>Monospace, italic font</i>	Command-line and code variables
Blue underlined sans serif font text ( <a href="http://www.hp.com">http://www.hp.com</a> )	Web site addresses

## Text symbols

The following symbols may be found in the text of this guide. They have the following meanings:

**WARNING:** Text set off in this manner indicates that failure to follow directions in the warning could result in bodily harm or death.

---

**Caution:** Text set off in this manner indicates that failure to follow directions could result in damage to equipment or data.

---

**Tip:** Text in a tip provides additional help to readers by providing nonessential or optional techniques, procedures, or shortcuts.

---

**Note:** Text set off in this manner presents commentary, sidelights, or interesting points of information.

---

## Equipment symbols

The following equipment symbols may be found on hardware for which this guide pertains. They have the following meanings:

Any enclosed surface or area of the equipment marked with these symbols indicates the presence of electrical shock hazards. Enclosed area contains no operator serviceable parts.

**WARNING:** To reduce the risk of personal injury from electrical shock hazards, do not open this enclosure.

---

Any RJ-45 receptacle marked with these symbols indicates a network interface connection.

**WARNING:** To reduce the risk of electrical shock, fire, or damage to the equipment, do not plug telephone or telecommunications connectors into this receptacle.

---

Any surface or area of the equipment marked with these symbols indicates the presence of a hot surface or hot component. Contact with this surface could result in injury.

**WARNING:** To reduce the risk of personal injury from a hot component, allow the surface to cool before touching.

---

Power supplies or systems marked with these symbols indicate the presence of multiple sources of power.

**WARNING:** To reduce the risk of personal injury from electrical shock, remove all power cords to completely disconnect power from the power supplies and systems.

---

Any product or assembly marked with these symbols indicates that the component exceeds the recommended weight for one individual to handle safely.

**WARNING:** To reduce the risk of personal injury or damage to the equipment, observe local occupational health and safety requirements and guidelines for manually handling material.

---

## Rack stability

Rack stability protects personnel and equipment.

**WARNING:** To reduce the risk of personal injury or damage to the equipment, be sure that:

- The leveling jacks are extended to the floor.
- The full weight of the rack rests on the leveling jacks.
- In single rack installations, the stabilizing feet are attached to the rack.
- In multiple rack installations, the racks are coupled.
- Only one rack component is extended at any time. A rack may become unstable if more than one rack component is extended for any reason.

---

## Getting help

If you still have a question after reading this guide, contact an HP authorized service provider or access the following HP web site: <http://www.hp.com>.

### HP technical support

Telephone numbers for worldwide technical support are listed on the following HP web site: <http://www.hp.com/support/>. From this web site, select the country of origin.

---

**Note:** For continuous quality improvement, calls may be recorded or monitored.

---

Be sure to have the following information available before calling:

- Technical support registration number (if applicable)
- Product serial numbers
- Product model names and numbers
- Applicable error messages
- Operating system type and revision level
- Detailed, specific questions

# Installation instructions

This document provides instructions for installing and uninstalling the Bridge Agent used by the C-FCSWAPI Software Development Kit (SDK). These instructions pertain only to the Microsoft Windows operating systems. This chapter contains the following sections:

- [C-FCSWAPI Bridge Agent overview](#), page 12
- [Installing the C-FCSWAPI Bridge Agent](#), page 12
- [Removing the C-FCSWAPI Bridge Agent](#), page 12

## C-FCSWAPI Bridge Agent overview

The C-based Fibre Channel switch application programming interface (C-FCSWAPI) is a library of switch-management functions callable from an application program written in C or C++. C-FCSWAPI enables software to communicate with switches, instead of requiring a user to interact manually with a graphical user interface (GUI) or command line interface (CLI).

C-FCSWAPI proxy connections route data from the C-FCSWAPI library to the C-FCSWAPI Bridge Agent and then from the C-FCSWAPI Bridge Agent to HAFM. To support this connection type, the C-FCSWAPI Bridge Agent must be installed on the HAFM appliance where HAFM is installed.

## Installing the C-FCSWAPI Bridge Agent

---

**Note:** Only one Bridge Agent can function on a system. Before installing the C-FCSWAPI Bridge Agent, remove any Bridge Agent that exists on the system.

---

To install the C-FCSWAPI Bridge Agent, use the following procedure:

1. Insert the installation CD into the CD-ROM drive.
2. Double-click the /Open Bridge Agent Installer/BridgeAgentInstall.exe file.  
The installer program opens and guides you through the installation process.
3. Click **Next** at the Introduction window. The Important Information window is displayed.
4. Click **Install**.

The installer starts the Bridge Agent and portmap as system services.

## Removing the C-FCSWAPI Bridge Agent

To remove the Bridge Agent for Windows, perform the following procedure:

1. Click **Start > Settings > Control Panel**. The Control Panel window is displayed.
2. Double-click **Add/Remove Programs**. The Add/Remove Programs window is displayed.
3. Select the Bridge Agent program and click **Change/Remove**.
